INSTALLATION AND USE

TOP-MULTI-EVOTECH pumps are recommended for pumping **clean water** and liquids that are not chemically aggressive for the materials from which the pump is made.

Because of their high efficiency and reliability they are suitable for use in applications such as domestic water supply from reservoirs, tanks or relatively deep wells, for drawing rain water from cisterns to water gardens or for use in irrigation systems, etc.

An internal electronic device starts or stops the pump automatically when the tap is opened or closed.

OPTIONS AVAILABLE ON REQUEST

- Other voltages or 60 Hz frequency
- KGE Floating suction kit

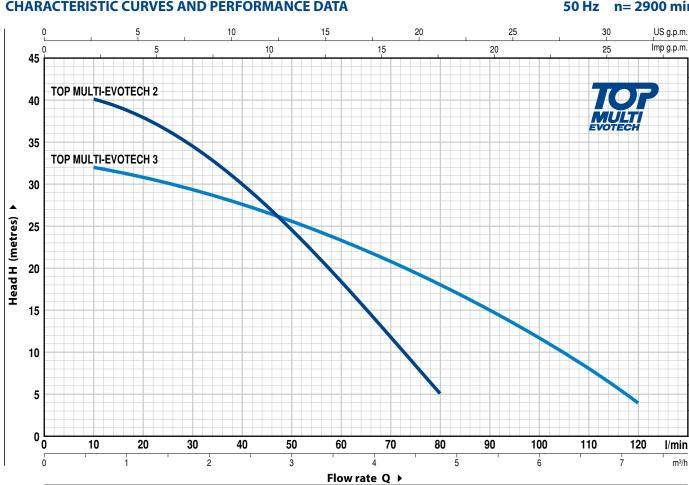

Kit includes:

- 1.5 metre long PVC hose (Ø 30 mm)
- stainless steel suction filter
- polyethylene spherical float
- flexible hose fittings Ø 30 mm

TOP MULTI-EVOTECH with KGE kit for aspiration at about 10 cm below the water surface, preventing the suction of any floating waste or sediment on the bottom of the tank thus avoiding any damage to the pump.

It protects the pump:

- against dry running;
- against blockage: after long periods of pump inactivity the electronic device starts the pump every 48 hours for 10 seconds.
